

Water Regulators

For a consistent pot of coffee, your water supply must have a consistent flow rate . And since flow is driven by pressure, the easiest solution is to install a regulator in your coffee pot line and then adjust your fill timer.

FlowJet 1750 Series Water Pressure Regulators

Product Features:

- Minimizes inlet water fluctuation
- Limits inlet water pressure to levels safe for pumps and appliances
- Can be mounted in any position
- Available in 15, 30, 50, & 80 psi max. models
- Manufactured with food grade materials
- Accepts 1/2" Male NPT fittings
- Handles water temperatures up to 150 degrees F
- Removable, cleanable screen protects pumps and appliances from debris

Model Number	Max Output Pressure	Cost
01750-302	50 PSI	
01750-322	30 PSI	

SHURflow 183 Series Water Pressure Reducer Valves

SHURflo’s 183 series is a fixed water pressure reducing valve (non-adjustable). Its function is to minimize input water pressure fluctuations while guarding against high incoming spikes of pressure.

Model Number	Max Output Pressure	Cost
183-130-00	50 PSI	
183-150-00	30 PSI
