

## Water Pumps

### FLOJET BW Series Bottled Water Pump

At just 6" x 8" the new Flojet Bottled Water Dispensing System is the most compact system you can buy and it's the most affordable. And since it's from Flojet, it's remarkably well-engineered.

**Product Features:**

- Float switch for automatic shut-off when bottle is empty.
- Built-in check valve to prevent back flow.
- Universal seal cap fits most water containers.
- Compact size for easy mounting.
- 20" discharge hose included.
- Easily installed.

**P/N - BW-1000A**

**Specifications:**

- Max. Flow Rate: 1.0 gpm
- Max. Pressure: 40 psi
- Dimensions: 3.0"H x 5.5"W x 7.5"D
- Voltage: 115 VAC
- Amp Draw: 0.5 Amps. Max.
- Weight: 5.6 lb
- Standard Models (Includes 20 feet of 1/4" tube);6 foot cord with plug.

**System Installation:**

Mount the system in a convenient location with access to 120 Volt AC power and space for the bottled water and install the suction wand in the water bottle. Insert the outlet tubing into connector fitting and route it to the refrigerator, water tap or coffee maker. More than one item (coffee maker, etc) can be supplied by splitting the water line with one or more tees.

Note: It's recommended that you install a in-line filter with scale reduction if plumbing coffee makers with this pump as the mineral content of some bottled water can be very high. Recommended filter for coffee is an EVERPURE
